Fact Sheet as of 7/10/19

## PROJECT OVERVIEW

Located in the heart of Old Towne Orange, the Orange Transportation Center is serviced by Metrolink and Orange County Transportation Authority (OCTA) bus routes which provide connectivity to downtown Orange business, Chapman University, and other nearby destinations and employment centers.

To provide for current demand and future growth, OCTA and the City of Orange constructed a new shared use multi-story parking structure. Designed to reflect the community's historic setting, the parking structure provides 608 parking spaces, 24 bike lockers, car charging stations and includes solar panels on the top level. This multi-use parking structure increases accessibility to and from the Orange Transportation Center and downtown Orange. This project is funded in part by OC Go, formerly Measure M, Orange County's voter approved half-cent sales tax for transportation improvements.

## NEW FEATURES

- 608 New Parking Spaces:**  
 This five-story structure located at the corner of Chapman Avenue and Lemon Street created additional parking spaces to improve accessibility for Metrolink riders and motorists visiting Old Towne Orange.
- Electric Car Charging Ports:**  
 Several dedicated parking spaces feature electric car charging ports, allowing for eco-friendly vehicles to plug in and recharge.
- Historic Design:**  
 The structure and plaza area reflect the historic character and scale of Old Towne Orange to blend into the architectural design of the historic district.
- Solar Panels:**  
 Solar panels are placed on the facility's roof, thereby providing required lighting and reduced energy costs
- Bike Racks and Lockers:**  
 This newly added feature will encourage active transportation providing commuters peace of mind knowing there is a secure place to their bicycles.
